<b>PB120830</b>	12" x 8" x 30"	1 mil	500/cs

#### LK® Side Gusset Bags

Gusseted bags feature creased sides that expand to accommodate bulky items. Low Density Polyethylene (LDPE) bags are the most commonly used plastic bag because they provide excellent protection and a great value. Elkay polyethylene bags are made from virgin materials, so they comply with FDA requirements for use in food applications.

<b>10G-108024</b>	10 x 8 x 24	.001 gauge	500/cs
-------------------	-------------	------------	--------

#### LK® TUF-R® Linear Low Density Gusset Bags

Tuf-R® Linear Low Density Polyethylene (LLDPE) bags provide extra strength and puncture resistance compared to low density bags of the same gauge. Because of this, it's often possible to use a lighter gauge Tuf-R® bag to do the job of a heavier gauge LDPE bag, which saves money and helps to reduce the environmental impact. Tuf-R® bags are made from virgin materials, so they comply with USDA and FDA requirements for use in food applications.

## Bakery Boxes

### Southern Champion

#### Automatic One Piece Window Bakery Boxes

Automatic, 1 piece box, full top, 6-corner beers, SBS, packed in corrugated. Made of SBS paperboard, which is white on the inside and outside, has an attached top, and can be used to hold and carry baked goods. White SBS (solid bleached sulfate) paperboard is thicker and more rigid than paper, can be recycled, just be sure to remove the window film before placing in the bin. The attached top flips open to insert or remove baked goods. When closed, the top fully overlaps the bottom. A cellophane window provides a view of the box's contents. The box has a six-corner beers design with six glued corners for sturdiness. Diagonal scores allow the box to be folded flat for storage or transport.

## Dart® Foam Hinged Lid Containers

Hinged containers available non-perforated or with the PERFormer™ perforated hinge that allows the container's lid to be removed. Stackable. Secure closure. Has high insulation properties to keep hot food hot and cold foods cold. The vented container comes with the PERFormer™ perforated hinge. Vent holes on sidewalls of the lid preserve food quality (i.e. crispiness) by allowing steam to escape. These containers feature either a double lock closure or a "knuckle" locking tab intended to prevent accidental openings. When closed, a perimeter seal keeps food secure, reducing leaks. Tabs on base ensure container stay closed when picked up by the lid. Also available in black.

**Strong Man Coreless Roll Can Liners**

Made with a combination of LLDPE and LD resins. LLDPE has a high tensile strength and high impact and puncture resistance. It is very flexible and will elongate under stress. This provides the extra strength, elasticity and performance at lower mil weights. LLDPE also has a good resistance to chemicals; they will perform well in temperature extremes and confine odors. LD is the most common plastic used to make can liners, as it is rather soft and flexible. By blending it with LLDPE, the strength increases without losing the thinner mil weights and flexibility. Has a star-seal bottom. Perforated coreless roll.
